**EMS System Operations** 

Subject: BLS/LALS/ALS Unit Inventory Policy # 4005

Date: 07/01/2021

1 of 5

I. Purpose: Identify a minimum standardized inventory on all BLS, LALS and ALS units.

## II. Policy:

A. Each ambulance and first responder unit shall be equipped with the following functional equipment and supplies. This list represents mandatory items with minimum quantities excluding narcotics, which must be kept within the range indicated. All expiration dates must be current. All packaging of drugs or equipment must be intact. No open products or torn packages may be used.

B. In addition to this inventory list, all transport ambulances shall be stocked in compliance with California Code of Regulations, Title 13, Division 2, Chapter 5, Sections 1103 and 1103.2.

C. First responder agencies that operate primarily in austere environments may submit a modified minimum inventory list to the Imperial County EMS Agency for approval.

IO- Jamshidi needle 15 g				1	1

<sup>\*</sup>Prehospital provider agencies shall attempt, when possible, to use patient equipment that minimizes exposure to latex containing products. Barrier protection is acceptable. Prehospital staff should minimize their own exposure to latex products at all times. Staff shall be knowledgeable in procedures to use latex-containing products in a latex-safe manner. Such methods include

- 1. Barrier protection measures (example for stethoscope). If barrier protection is used, materials should be easily available to implement the barrier:
- 2. Procedures to remove or cover latex-containing parts (such as caps on multi-dose vials).
