

Public Input on Changes to Standards for Septic Systems near Impaired Water Bodies in Imperial County

COMMUNITY MEETINGS

The Imperial County Public Health Department's Environmental Health Program has initiated a public comment period on its draft Local Agency Management Program (LAMP) document for septic systems. Three public community meetings have been scheduled where staff will review the regulations and collect feedback and comments from the public. Owners of existing septic systems will need to continue to meet current standards; however those adjacent to an impaired water body who install a new or replacement septic system or have an existing system that has failed may be required to comply with enhanced protection standards.

Topics:

Which areas of Imperial County will be affected?

Changes to the current rules for septic systems.

Who should attend?

Property and business owners with installed septic systems, developers and owners of local construction companies and interested members of the public.

The LAMP document is posted on the Public Health Department's website on the following link:
<http://www.icphd.com/environmental-health/documents-for-public-review/>

Information:

Jeff Lamoure, Imperial County Environmental Health:

Tuesday, October 20th, 2015

6:00pm – 7:30pm

383 Main St., Brawley, CA

Wednesday, October 21st, 2015

6:00pm – 7:30pm

Public Health Dept. Training Center

935 Broadway, El Centro, CA

Friday, October 23rd, 2015

3:00pm – 4:30pm

Palo Verde Improvement Assoc.

1050 Desert View St., Palo Verde

Spanish interpretation services will be available at the community meetings.

Cambios a los Reglamentos de Sistemas Sépticos cercas de Aguas Impactadas en el Condado Imperial

REUNIONES COMUNITARIAS

El Departamento de Salud Pública del Condado Imperial ha iniciado un periodo de comentario público del documento Programa de Manejo de Agencia Local (o LAMP por sus siglas en ingles) tocante sistemas sépticos. Habrá tres reuniones comunitarias donde personal repasara los reglamentos y coleccionara comentarios por parte del público. Los dueños de sistemas sépticos existentes continuaran cumpliendo con los reglamentos actuales, sin embargo aquellos cercas de aguas impactadas que instalen o cambien sus sistemas sépticos o que tengan un sistema que falle serán los afectados.

Temas:

Los lugares afectados en el Condado Imperial.

Cambios a los reglamentos actuales que gobiernan la instalación de sistemas sépticos.

Quien debe participar:

Propietarios y dueños de negocios que cuentan con sistemas sépticos instalados, dueños de compañías de construcción y desarrollo y personas interesadas del público en general.

El documento LAMP e información detallada está disponible en la página web del Depto. de Salud Pública del Condado Imperial
