Let’s Get Healthy California Announces Local Innovations to Improve California’s Health
Finalists are invited to present at 2016 Innovation Conference

SACRAMENTO – The California Health and Human Services Agency (CHHS) and the California Department of Public Health (CDPH) today announced 23 community-based health innovations that advance the Let’s Get Healthy California effort to make California the nation’s healthiest state by 2022. These innovations will be recognized and discussed as part of an Innovation Conference in Sacramento on January 26, 2016.

“We invited communities across the state to submit innovative ideas and projects that further the Triple Aim of better health, better care, and lower cost in California,” said CHHS Secretary Diana Dooley. “This is a great opportunity to recognize and learn from the work going on at a local level to meet the goals of our Let’s Get Healthy California initiative.”

“The Let’s Get Healthy California Innovation Challenge was designed to promote improvement in population health and care through new pathways,” said CDPH Director Dr. Karen Smith. “It encouraged the state and locals to collaborate, share ideas, and learn from one another to support new and creative ways to make California the healthiest state in the nation.”

CHHS and CDPH received nearly 100 submissions from community and health advocates, health care providers, community based organizations, civic and data enthusiasts, and many other individuals as part of this past summer’s Innovation Challenge. January’s conference will showcase and also measure California’s progress to meet the six goal areas of the Let’s Get Healthy California report.

In 2012, Governor Brown issued Executive Order B-19-12 to create the Let’s Get Healthy California Task Force with the goal of making California the healthiest state in the nation by 2022. The Let’s Get Healthy California initiative focuses on furthering the Triple Aim – better health, better care and lower costs – and promoting health equity. It consists of two strategic directions – Health Across the Lifespan and Pathways to Health—and six major goal areas – Healthy Beginnings, Living Well, End of Life,
Redesigning the Health System, Creating Healthy Communities, and Lowering the Cost of Care. For more information on the Innovation Challenge and conference, visit the Let’s Get Healthy California webpage.

The 23 selected health innovations are listed below. For more information on each of the innovations, please visit CHHS’ Let’s Get Healthy California webpage.
