## Confirmed cases in Imperial County

Episode date	<a href="#">Reported date</a>
--------------	-------------------------------

**34,177** total confirmed cases  
47 new cases (0.1% increase)  
27.0 cases per 100K (7-day average)

## Positivity rate in Imperial County

**10.6%** test positivity (7-day rate)  
2.9% increase from 7-days prior

## COVID-19 hospitalized patients in Imperial County

Hospitalized	<a href="#">ICU</a>
--------------	---------------------

**39** COVID-19 hospitalized patients  
3 more patients hospitalized from prior day total (8.3% increase)

**Additional State Resources Deployed**

Cases includes people in state and federal prisons, US Immigration and Customs Enforcement facilities, US Marshal detention facilities, and Department of State Hospitals facilities.

## Unvaccinated and vaccinated data

<https://covid19.ca.gov/state-dashboard/>

Vaccines prevent serious illness, save lives, and reduce further spread of COVID-19. As more people are vaccinated, the virus is less likely to spread, mutate, and potentially become even more dangerous. Vaccines will help put an end to the pandemic.

Cases

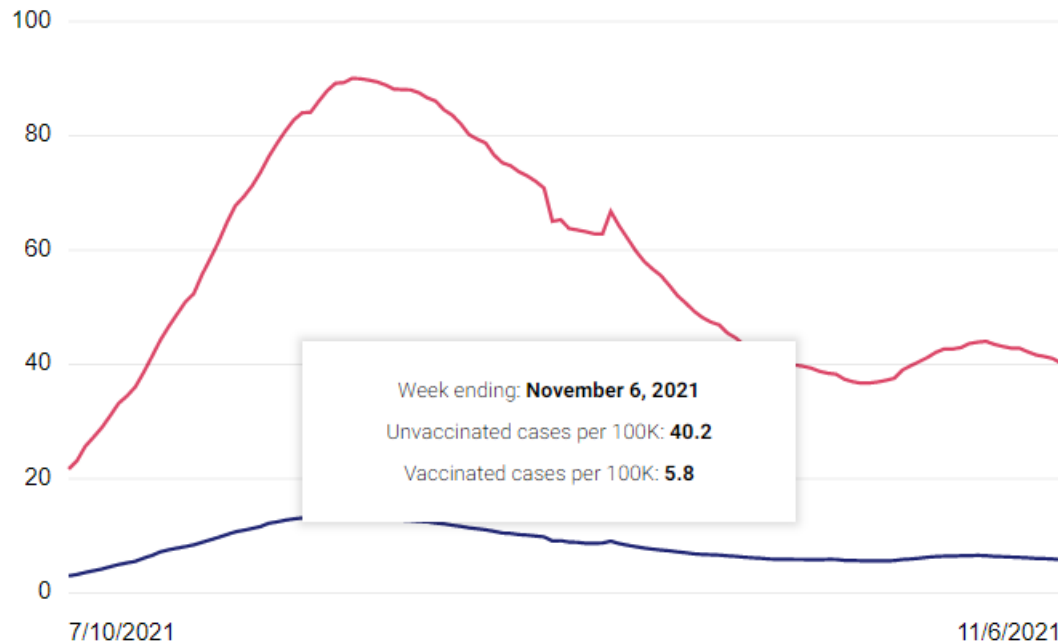

Hospitalizations

Deaths

From October 31, 2021 to November 6, 2021, unvaccinated people were **6.9 times more likely** to get COVID-19 than fully vaccinated people.

Cases per 100K (7-day running average)

— Unvaccinated — Vaccinated

## Unvaccinated and vaccinated data

<https://covid19.ca.gov/state-dashboard/>

Vaccines prevent serious illness, save lives, and reduce further spread of COVID-19. As more people are vaccinated, the virus is less likely to spread, mutate, and potentially become even more dangerous. Vaccines will help put an end to the pandemic.

Cases

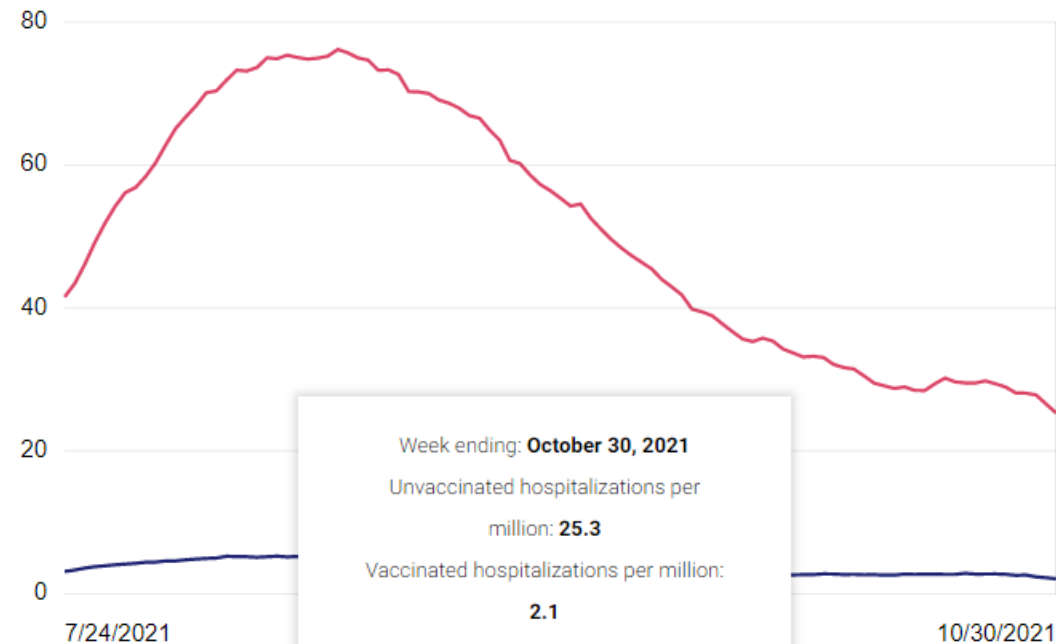

Hospitalizations

Deaths

From October 24, 2021 to October 30, 2021, unvaccinated people were **11.9 times more likely** to be hospitalized with COVID-19 than fully vaccinated people.

Hospitalizations per million (7-day running average)

Unvaccinated Vaccinated

## Unvaccinated and vaccinated data

<https://covid19.ca.gov/state-dashboard/>

Vaccines prevent serious illness, save lives, and reduce further spread of COVID-19. As more people are vaccinated, the virus is less likely to spread, mutate, and potentially become even more dangerous. Vaccines will help put an end to the pandemic.

Cases

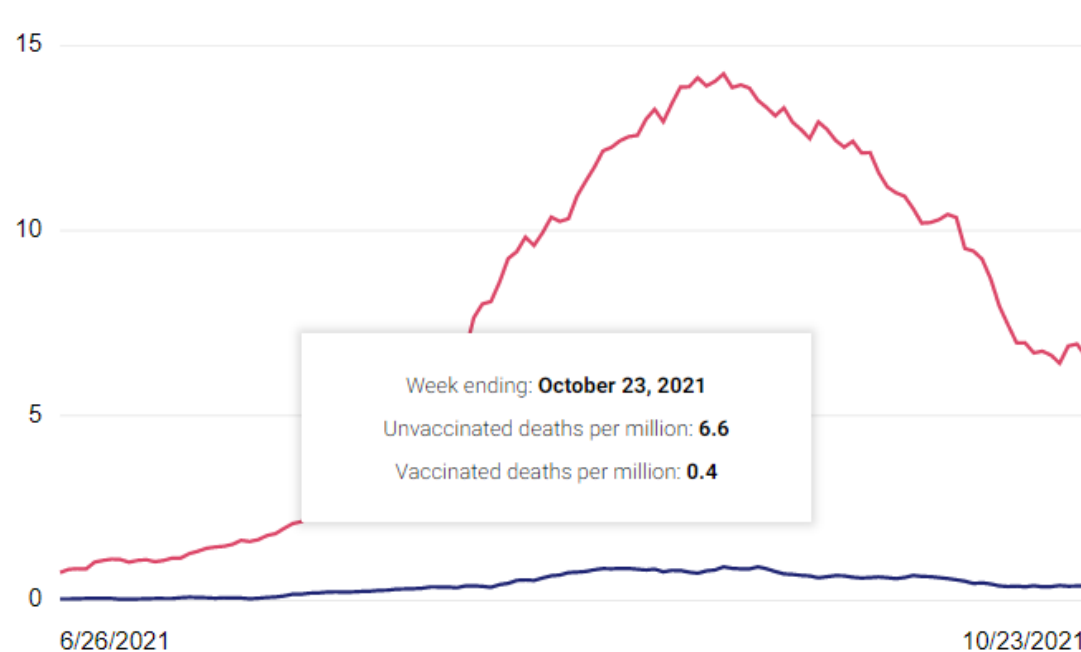

Hospitalizations

Deaths

From October 17, 2021 to October 23, 2021, unvaccinated people were **16.5 times more likely** to die from COVID-19 than fully vaccinated people.

Deaths per million (7-day running average)

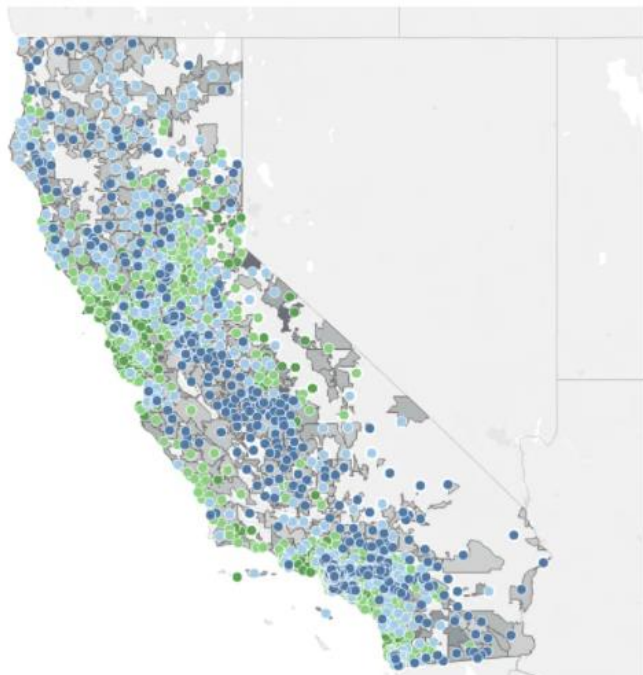

— Unvaccinated — Vaccinated

# COVID-19 Vaccination

<https://covid19.ca.gov/vaccination-progress-data/>

## Vaccinations by zip code

- Eligible population: 5 years of age & older
- 292,220 doses administered in Imperial County
- 74.1% fully vaccinated (131,631 individuals)
- 16.9% partially vaccinated (30,052 individuals)

Select the image to go to [an interactive version of the map](#).

# COVID-19 Booster/Additional Dose

<https://covid19.ca.gov/vaccines/>

**Booster shots** are now available for everyone 18 and older.

- If you got a **Pfizer or Moderna** vaccine and feel you're at risk, get a booster shot after 6 months
- If you got a **Johnson & Johnson** vaccine, get a booster shot after 2 months
- Your booster shot can be a different vaccine brand than you received before, as long as you completed your original vaccination series (one dose of Johnson & Johnson or two doses of Pfizer or Moderna).

[Booster facts](#) and [Booster questions and answers](#)

**Additional doses** of **Pfizer or Moderna** COVID-19 vaccines are now available for those with moderately to severely compromised immune systems. This includes people who:

- Get **active cancer treatment** for tumors or cancers of the blood
- Got an **organ transplant** and are taking medicine to suppress the immune system
- Got a **stem cell transplant** within the last 2 years or are taking medicine to suppress the immune system
- Have **moderate or severe primary immunodeficiency** (such as DiGeorge syndrome, Wiskott-Aldrich syndrome)
- Have **advanced or untreated HIV infection**
- Get **active treatment with high-dose corticosteroids** or other drugs that suppress immune response

Vaccines

## Key Things to Know About COVID-19 Vaccines

### What You Need to Know

- Everyone ages 5 and older can get vaccinated against COVID-19. Learn how to find a COVID-19 vaccine.
- COVID-19 vaccines are effective at helping protect against severe disease and death from the virus that causes COVID-19, including known variants currently circulating (e.g., Delta variant).
- The benefits of COVID-19 vaccination outweigh the known and potential risks, which are rare.
- As with other routine vaccines, side effects may occur after vaccination. These are normal and should go away within a few days.
- People who are fully vaccinated can resume many activities they did before the pandemic. However, people should wear a mask indoors in public if they are in an area of substantial or high transmission.
- People who are moderately to severely immunocompromised are recommended to get an additional primary dose of an mRNA COVID-19 vaccine (i.e., Pfizer-BioNTech or Moderna).
- Certain groups of people are recommended to get a COVID-19 booster shot.
- Unlike many medications, COVID-19 vaccine dosage does not vary by patient weight but by age on the day of vaccination.
- People can get a COVID-19 vaccine and other vaccines, including flu vaccine, at the same time.

## Frequently Asked Questions about COVID-19 Vaccination

Updated Nov. 5, 2021

Languages ▾

Print

**NOTICE:** CDC now recommends that children between the ages of 5 and 11 years receive the Pfizer-BioNTech pediatric COVID-19 Vaccine. Learn more about [vaccines for children and teens](#).

- Below are answers to commonly asked questions about COVID-19 vaccination.
- [Bust myths and learn the facts about COVID-19 vaccines](#)

### Safety

Are COVID-19 vaccines safe even though the vaccines were developed rapidly?

What are the ingredients in COVID-19 vaccines?

If I am pregnant or planning to become pregnant, can I get a COVID-19 vaccine?

Why should my child get vaccinated against COVID-19?

### Getting Your Vaccine

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/faq.html>

# About the COVID-19 Vaccine: Frequently Asked Questions

[Home](#) / [Critical Updates on COVID-19](#) / [COVID-19 Vaccine for Children](#) / About the COVID-19 Vaccine: Frequently Asked Questions

The COVID-19 vaccine is our best hope for ending the current pandemic. While the goal will be to administer vaccine to as many people as possible, as quickly as possible, vaccine supply will be limited initially. As a new vaccine, there are many questions that pediatricians and patients/families have. Below are answers to some of the most common questions.

Please note that this information will be updated regularly as data about COVID-19 vaccine becomes available.

## New FAQs

### Q: Can I administer a COVID-19 vaccine to a patient who is currently sick with COVID-19?

A: COVID-19 vaccination should be deferred for patients with a current SARS-CoV-2 infection until they recover from their acute illness and the criteria to discontinue isolation has been met. Patients who are asymptomatic should receive COVID-19 vaccine following their recommended isolation period. This also applies to people who become infected with COVID-19 between their first and second dose of vaccine.

### Q: Now that 2 different formulations of Pfizer-BioNTech COVID-19 vaccine are available, what do I do if the wrong product or dose is given to a child or adolescent?

A: The [CDC Interim Clinical Considerations \(Appendix A\)](#) includes a table that outlines interim recommendations for COVID-19 vaccine
