Starting March 10, 2022, the Imperial County Public Health Department will no longer display hospital data on the local COVID-19 dashboard. For updated state and local COVID-19 hospital data, the public can access it on the California COVID-19 website.

Your Internet browser may be loading the page from its cache and may not reflect the most recent data. Please refresh your page and/or cache to view the most current version of the data. This dashboard provides surveillance information about the Coronavirus Disease 2019 (COVID-19). Data used to produce this dashboard is updated daily but is considered preliminary and subject to change as a result of ongoing investigations being conducted by the Imperial County Public Health Department.

Isolation/Quarantine Health Orders

IMPERIAL COUNTY PUBLIC HEALTH DEPARTMENT
935 BROADWAY ST.
EL CENTRO, CA 92243
TEL: (442) 265-1444

ORDER OF THE HEALTH OFFICER (Isolation of All Persons with or Likely to have COVID-19)

The spread of coronavirus disease 2019 (COVID-19) is a substantial threat to the public's health. Imperial County is currently subject to a declared local health emergency and a proclaimed local emergency due to the COVID-19 pandemic, and the Governor of the State of California proclaimed a state of emergency. Everyone is at risk for becoming ill with COVID-19, but some people are more vulnerable to serious illness due to age or underlying health conditions. In order to slow the spread of COVID-19 and prevent the healthcare system in Imperial County from being overwhelmed, it is necessary for the Health Officer of the County of Imperial (Health Officer) to require the isolation of persons diagnosed with, or likely to have COVID-19.

The Health Officer therefore **ORDERS** pursuant to California Health and Safety Code sections, 101040, 120130, 120175, 120215, 120220, and 120225:

1. **All persons who have been diagnosed with, or are likely to have COVID-19, must immediately take the following actions:**
 - Isolate in their home or another residence. If isolated in a congregate setting, hotel or multi-unit setting, the person may not enter any other units within that setting. Persons may only leave their place of isolation to receive necessary medical care.
 - Carefully review and closely follow all requirements of the Health Officer and medical provider.
 - Notify all persons in close contact that they may need to quarantine themselves for up to 5 days after the last contact, as noted in Public Health Officer's Quarantine Order.
 - A person is considered to be a close contact of a person diagnosed with, or likely to have COVID-19, if within 48 hours before that person's symptoms began (or, for asymptomatic patients, 2 days prior to test specimen collection) and until that person is no longer required to be isolated, they:
 - Were within 6 feet of a person who has or is likely to have COVID-19 for a cumulative total of 15 minutes or more over a 24-hour period; or
 - Had unprotected contact with the body fluids and/or secretions (including but not limited to being coughed on or sneezed on, sharing utensils or drinking out of the same container) of a person who has or is likely to have COVID-19.
 - Not come within 6 feet of any person, excluding a treating medical professional, a law enforcement officer enforcing this Order, a representative of the Health Officer, any other person specifically authorized by the Health Officer, or a caretaker.

IMPERIAL COUNTY PUBLIC HEALTH DEPARTMENT
935 BROADWAY ST.
EL CENTRO, CA 92243
TEL: (442) 265-1444

ORDER OF THE HEALTH OFFICER (Quarantine of All Persons with or Likely to have COVID-19)

Everyone is at risk for becoming ill with COVID-19, but some people are more vulnerable to serious illness due to age or underlying health conditions. Imperial County is currently subject to a declared local health emergency and a proclaimed local emergency due to the COVID-19 pandemic, and the Governor of the State of California proclaimed a state of emergency. In order to slow the spread of COVID-19, and prevent the healthcare system in Imperial County from being overwhelmed, it is necessary for the Health Officer of the County of Imperial (Health Officer) to require the quarantine of persons exposed to COVID-19.

Household contacts, intimate partners, caregivers, and any other person who have been in close contact with a person either diagnosed with COVID-19, or likely to have COVID-19 (COVID-19 Patient), are subject to this Order unless a specific exception applies. A "close contact" is a contact with a COVID-19 Patient that occurs anywhere between 48 hours before the COVID-19 Patient's symptoms began (or, for asymptomatic patients, 2 days prior to test specimen collection), and until the COVID-19 Patient is no longer required to be isolated, and where they were within 6 feet of a COVID-19 Patient for a cumulative total of 15 minutes or more over a 24-hour period; or had unprotected contact with the body fluids and/or secretions (including but not limited to being coughed on or sneezed on, sharing utensils or drinking out of the same container) of a person who has or is likely to have COVID-19.

This order requires persons to follow the quarantine periods and measures applicable to their unique situation. The length of the quarantine, and the measure to be taken, may be different based on factors such as vaccination status, health conditions, COVID-19 symptoms, workplace setting, or school setting. Since these requirements may change based on new data, this Order incorporates detailed quarantine criteria and measures in the hyperlinks below. If the documents linked below are updated, those updates will automatically be part of this Order.

This Order does not prevent an employer, school, facility, the California Department of Public Health (CDPH), or a licensing agency from imposing more stringent quarantine requirements.

Thank you

www.icphd.org
